Summary

IT Infrastructure Engineer with 7+ years of experience supporting enterprise technology across healthcare, banking and hospitality. Skilled in network administration, Windows Server, Active Directory, Microsoft Entra ID, firewall management and VLAN segmentation. Serve as the primary internal onsite IT resource for a multisite healthcare organization, coordinating infrastructure upgrades, branch relocations vendor support and critical incident resolution. Bring hands-on experience with SonicWall firewalls, Unifi/Cisco switches and Ubiquiti wireless access points.

Key Achievements

Multisite Infrastructure Ownership

Serve as the sole internal IT resource, coordinating branch infrastructure support, urgent troubleshooting and vendor escalations across a distributed healthcare organization.

Network Infrastructure Delivery

Configure and troubleshoot SonicWall's firewalls, Unifi/Cisco switches and Ubiquiti access points, including VLAN segmentation and branch connectivity.

Branch Relocations & Technology Readiness

Execute onsite technology setup for branch moves and buildouts, including networking, workstations, printers and post-move troubleshooting.

Experience

Marks Home Care Agency

Brooklyn, NY

Senior IT Infrastructure Engineer

03/2024 - Present

- Serve as the primary internal IT infrastructure owner across multiple healthcare branch locations, supporting network reliability, hardware lifecycle management, onsite escalation, and business continuity
- Configure, troubleshoot, and support enterprise network infrastructure including routers, switches, core switch uplinks, wireless access points, firewalls, SonicWall site-to-site VPN tunnels, VLAN segmentation, and site connectivity
- Lead onsite infrastructure execution for branch moves, office buildouts, and relocation projects, including network readiness, hardware transport, workstation setup, printer/scanner deployment, and post-move support
- Provide critical onsite support for the company's third-party MSP by handling physical infrastructure issues, escalation response, site-specific troubleshooting, and technical documentation that remote helpdesk teams cannot complete
- Provision and standardize endpoints and office hardware including desktops, laptops, monitors, docking stations, printers, scanners, networking equipment, and complete new-hire technology setups
- Created and maintained IT equipment layouts, site blueprints, and branch documentation to improve asset visibility, reduce troubleshooting time, and streamline infrastructure planning for future projects
- Support operational reliability as the sole internal onsite IT resource by responding to network outages, urgent hardware failures, branch leadership requests, and time-sensitive infrastructure issues

The Mark Hotel

Manhattan, NY

System Analyst

11/2023 - 04/2024

- Enforced Active Directory security policies for 300+ users; cut unauthorized access incidents 95%
- Migrated 500 users from legacy PBX to NEC VoIP; achieved 99.99% call availability post-transition
- Maintained Windows Server environment (10+ physical, 20+ virtual machines); supported stability and uptime
- Produced migration plans with risk assessments and dependency mapping for 50+ business-critical applications
- Managed Microsoft 365 license assignments and users access for Sharepoint, Exchange Online and Teams.

Santander Bank

Holmdel, NJ

Senior IT Support Specialist

10/2022 - 10/2023

- Closed 92% of L3 escalations within 3 hours, improving productivity 20%
- Administered TCP/IP networks supporting 300+ users; increased performance 10%
- Trained new hires on SharePoint and Active Directory; achieved 95% satisfaction score

Penn Medicine University Hospital

Princeton, NJ

Senior IT Support Specialist

03/2021 - 09/2022

- Used packet analysis to identify bottlenecks; lowered network outages 25%
- Operated ServiceNow ITSM for 5,000+ users; managed patches and upgrades to minimize business impact
- Troubleshooting DNS/DHCP/IP issues; decreased monthly downtime incidents by 25%

Experience

ZT Systems Data Center
Hudson County, NJ

Computer Server Technician / Tester
02/2019 - 02/2021

- Troubleshot, tested, and validated multiple enterprise server systems daily, supporting hardware diagnostics, failure isolation, and production readiness
- Configured and supported server builds for major cloud and enterprise environments, including Amazon and Microsoft server hardware platforms
- Executed hardware and software test procedures, documented failures, and assisted engineering teams with root-cause analysis for server performance and reliability issues
- Built and prepared server systems from physical hardware assembly through network cabling, component validation, and infrastructure readiness testing

Rutgers University
Piscataway, NJ

Help Desk
03/2018 - 10/2018

- Addressed computer-related issues by serving as the first point of contact for staff and students, supporting 30+ staff members
- Assisted with password changes and Net ID and service activation
- Handled 80 tickets per week, performed basic troubleshooting procedures, troubleshot printer issues, and set up VPN access on staff mobile devices

Skills

Routing/switching · VLANs · wireless APs · routers · firewalls · VPN support · ISP cutovers · network troubleshooting · site readiness · branch infrastructure support · site-to-site VPN · remote VPN · backbone networking · core switch uplinks · disaster recovery planning · scripting (PowerShell/Python) · Microsoft 365 · Microsoft Azure · Ubuntu · SSH

Systems & Identity: Windows Server · Active Directory · Group Policy · Microsoft Entra ID · MFA · Conditional Access · RBAC · SCCM · Hyper-V · VMware

Hardware & Data Center:
Server hardware troubleshooting · rack/server builds · network cabling · hardware provisioning · endpoint lifecycle management · printers/scanners · docking stations · workstations

IT Operations & Delivery:
ServiceNow · Jira · SLA management · change planning · vendor coordination · MSP oversight · asset tracking · documentation · runbooks · escalation response · IPSec · service ticketing · printer troubleshooting · mobile VPN access

Security & Reliability: Firewall policy support · vulnerability management · access control · uptime support · incident triage · operational risk reduction

Education

Ramapo College of New Jersey
Mahwah, NJ

B.A., Social Science
2016

Training / Courses

Microsoft/LinkedIn System Administration course — LinkedIn

Practical Ethical Hacking — TCM Security

Certifications

CompTIA Security+

Projects

Home Lab Infrastructure & Automation
New York, NY

2026

Home Lab Infrastructure & Automation

- Built and maintain a home lab with Synology NAS, Unifi switch and wireless AP, UPS power protection and two wired workstations, including remote access to one host.
- Deployed self-hosted n8n in Docker (Synology Container Manager) on a static-IP NAS to automate home lab and infrastructure workflows.
- Configured offsite backups with Synology Hyper Backup to AWS S3 for cloud-based data protection and recovery.
- Planning automated cluster builds across lab hosts as the environment expands.
